Our goal is to offer a wide range of functional and high-quality ready-to-use products at affordable prices for everyone, as well as comprehensive after-sales services. This brochure includes a small portion of our product range. The full product catalog is available at your local store and at [www.nikolaoutools.gr](http://www.nikolaoutools.gr). Our website is for informational purposes only and does not operate as an online store. The company D. Nikolaou S.A. does not conduct direct sales to consumers. Sales of products are carried out exclusively through our network of partner stores across Greece. The photos are indicative. The company is not responsible for any typographical errors. All listed prices are suggested retail prices, including VAT. Prices are valid until stocks are exhausted. The company reserves the right to change technical specifications, equipment, and prices without prior notice. D. Nikolaou S.A. encourages the recycling of this brochure and the packaging of its products. In case that a gift runs out of stock, the company is obliged to replace it with another of equal value. The SDS-MAX four-spoke has a large carbide tip with two lateral auxiliary carbides that ensures low vibrations, optimization of drilling performance when it finds reinforced steel and longer life. The double helical winding achieves high dust removal, optimized drilling speed, less wear and lower temperature accumulation.

Advantages of drill head: Accurate point drilling due to built-in central drill. Faster drilling thanks to the quality of the carbides and the geometry of the cutting head. The extremely large spiral tubes result in a smooth transfer of dust during drilling.

The HSS-Co drill is a high-performance cobalt drill. Even with insufficient cooling, it has resistance to thermal resistance. Due to the addition of 5% Co alloy to the cutting material, these drills can be used to work on materials with a tensile strength of more than 800N / m<sup>2</sup>. Suitable for cutting metals and stainless steels.

Designed for long life and high cutting efficiency. Always use the recommended operating speed, increase the speed slowly until a small cut is observed. When drilling in metals (except cast iron) always use cutting oil. Regularly remove the grout when cutting. The center drill should be approximately 3-4 mm above the saw teeth but not more than the thickness of the workpiece / Make sure that the hole saw is always perpendicular to the surface of the workpiece. Suitable for cutting metal, wood and plastic.
